LB&M Hansson

After 24 years of continuously racing pigeons We have decided that it is time that LB&M Hansson are to have a break from the sport, After deciding to take some time off I have mated our stock birds in a matter in which they have bred our future stock. This then means that We have approx 75 pigeons that we need to vacate hence the reason for having this Sale, this is in no way a clearance sale it is just that we are having some time away from the sport, and hopefully come back to the sport refreshed with a young selection of Stock therefore We have decided to have this sale, The birds that are in this sale have bred us many winners and that has been shown throughout our Federation places in the last 10 years. As many would know LB&M are a leading long distance flyer in the Toowoomba and District Pigeon Federation (TDPF) as you can see below in the past 10 years we have been involved in the Top 10 positions of these Long Points. Outside of the TDPF we have also been very successful with LB&M winning the 2000 Nockatunga National race winning both Queensland and

Overall and then in 2001 winning the Kynuna Cup race by over 2 hours.

Distance Highlights

In the last 10 years without a doubt this loft has been the most consistent Long Distance Loft in the TDPF.
